# Avigilon Control Center™ 7 Software

Avigilon Control Center (ACC) software is an easy-to-use video management software that is designed to optimize the way security professionals manage and interact with high-definition video. It efficiently captures and stores HD video, while intelligently managing bandwidth and storage using our patented High Definition Stream Management (HDSM) technology. Version 7 of the software introduces an entirely new way to monitor live video through its Focus of Attention interface, enabling operators to see at a glance what is happening across the entire site and more effectively triage and respond to the most important events.

### Focus of Attention Interface

Redefining live video monitoring, Focus of Attention helps increase operator effectiveness by providing an overview of events across all cameras in the site, including Avigilon analytic events, face and license plate watch list matches, Unusual Activity Detection (UAD) events, Unusual Motion Detection (UMD) events, motion events, and alarms. Operators can triage the most important events, reviewing associated video to determine if a response is required.

### Facial Recognition Technology

Accelerate response times using AI-powered facial recognition technology to detect people of interest based on secure watch lists managed by authorized users at the organization. Populate watch lists by uploading an image or finding a face from recorded video. Robust controls govern the accessibility and retention of watch list data. Start an Avigilon Appearance Search™ query for watch list entries, or receive alerts for potential watch list matches through the Focus of Attention interface. For added security, create alarms that trigger when any individual on the watch list is detected.

### Avigilon Appearance Search Technology

A sophisticated AI search engine that enables investigators to sort through hours of recorded video with ease and quickly locate a person or vehicle of interest across an entire site. Search for a person or vehicle of interest by entering a physical description, by uploading a photo, or by finding an example in recorded video.

### Next-Generation Analytics and Self-Learning Video Analytics

ACC™ video management software enables analytic events and alarms to be viewed and searched through an intuitive user interface. Real-time events and forensic capabilities detect and notify operators of scene changes and rules violations.

### Unusual Activity and Unusual Motion Detection (UAD & UMD)

Advanced AI technology highlights the unanticipated by automatically flagging unusual activity and motion. Without any configuration, UMD detects atypical movement while UAD is object-aware and detects anomalous behavior (speed and location) of people and vehicles.

### Preinstalled on Avigilon Recorders and Appliances

ACC software is pre-installed and configured on Avigilon HD Video Appliances, Network Video Recorders (NVRs), NVR Workstations, ACC ES Recorders, ACC ES Analytics Appliances, ACC ES 8-Port Appliances and the H4ES camera line. You can also install the stand-alone ACC software to meet the needs of a wide variety of projects. Our NVRs come pre-installed with the NVR Analytics Kit to enable our patented Avigilon Appearance Search technology.

## **Long Term Protection for Your Security System**

The security industry of today is vastly different from what it was 3 to 5 years ago. Three major factors have created this difference.

The first is technology. Processing power and the advent of applications over the Internet Protocol (IP) are changing technology at an unprecedented rate. These changes are happening in months not years. The second factor is company stability and commitment to service. With complex technology comes a much higher demand on technical certification and field service / support experience. Lastly, converged technology requires dependable help desk support and more frequent inspections of security components. Traditional break/fix coverage is no longer sufficient to insure optimum technology performance. Monitoring network capacity, inspecting software functionality, and periodic testing of onsite devices are integral to peak performance. Understandably, these changes have sharpened the focus on requirements for quality service and support.

Security 101 has never wavered from its core competency and commitment to its substantial and ever-growing customer base. It is this focus that allows Security 101 to proudly provide the most comprehensive service plans available – period!

Making a security system decision should be made with confidence, free from angst and doubt regarding vendor or equipment.

## **SafeGuard 101 BEST-IN-CLASS SERVICE**

Security 101 has been in the service delivery business for many years. We recognize that your satisfaction (and our reputation) depends entirely upon our performance and sensitivity to your business requirements. The SafeGuard 101 service plans have been created to provide total excellence – no surprises, no fine print. Just our "Fanatical Customer Service".

Employee safety, asset protection, access control, information security, Fire/life safety, and intrusion detection are very serious issues. Most companies do not take the time to understand the risks of not properly protecting a security system. Many service providers are not anxious to disclose the hidden costs.

There are three risks associated with system problems:

- 1) The cost to repair or replace a failed component.
- 2) The cost and availability of labor to diagnose and correct a wide variety of issues.
- 3) The cost and inconvenience of a breach of security to your business be it major or minor.

Security 101 has made coverage decisions designed to eliminate ALL surprises. In addition, by investing in a SafeGuard plan, you are choosing to proactively maintain and budget for your system's maintenance that will not only reduce system down time but also extend the life of the system.

## Service Plan Refusal (Optional)

By opting out of our comprehensive SafeGuard 101 service plans, you are assuming certain risks and potential costs that may arise from system issues. Below are the details of what you are missing out on and the associated risks:

### Benefits Missed:

- **Guaranteed Response Times:** With SafeGuard 101 Gold or Platinum Protection, you would have access to faster response times for both emergency and non-emergency service requests. This ensures that any issues with your security system are addressed promptly, reducing downtime and potential security vulnerabilities.
- **Preventative Maintenance Inspections:** Our Platinum Protection plan includes annual preventive maintenance inspections, which can significantly reduce the risk of critical equipment failures. This proactive approach helps maintain the integrity and performance of your security components.
- **Replacement of Disposable Parts:** Under the Gold and Platinum plans, Security 101 covers the replacement of certain disposable parts that may fail during the term of the agreement. This includes items like batteries, bulbs, and connectors, reducing the burden of unexpected costs for these replacements.
- **Training for Personnel:** SafeGuard 101 plans offer training sessions for your office personnel on system functionality. This ensures that your team is well-equipped to utilize the security system effectively, maximizing its potential and enhancing security measures.
- **Software Support Agreements & Subscription Services Discounts:** With the Platinum plan, you would benefit from a 10% discount on Software Support Agreements and Subscription Services, providing cost savings on essential software maintenance and updates.

### Risks of Refusal:

- **Cost of Repairs/Replacements:** Without a service plan, you would be responsible for the full cost of repairing or replacing any failed components of your security system.
- **Labor Costs and Availability:** Diagnosing and correcting system issues can incur significant labor costs, especially for complex security technologies. Availability of skilled labor on short notice may also pose challenges.

By refusing enrollment in a SafeGuard 101 Service Plan, you acknowledge and accept these risks and responsibilities. Please review and sign below to confirm your decision.
